

# INULIN POWDER

-COSMETIC GRADE-

## Specifications of Organic inulin

INCI Name: Inulin  
EINECS: No.232-684-3  
Part Used: Artichoke/Chicory Roots  
Active Ingredient: Polysaccharides  
Purity: 90% min  
Appearance: White Fine Powder  
Formula: C<sub>228</sub>H<sub>382</sub>O<sub>191</sub>  
Molecular Weight: 6179.36Da.  
Particle Size: 98% Pass 80mes

## Product Description of Organic inulin

A naturally occurring fructose polysaccharide found in the roots and rhizomes of several plants, for example, chicory.

It is used in skincare for its prebiotic activity, meaning that it reduces the growth of bad bacteria in favor of friendly microorganisms naturally present on the skin.

## Applications of Organic inulin

Inulin is a natural humectant, drawing water from the environment into the skin, thus helping to keep it hydrated. Inulin also acts as a skin-conditioning agent, by forming a thin film on the skin, leaving the skin smooth. It also helps to offset factors that lead to redness, dryness, and aging

An essential active for all skin types to boost skin tolerance.

Extracted from chicory roots, this protective prebiotic rebalances the skin's microbiota to form a natural defensive shield and keep skin healthy.
